## 1. Introduction

APRO Rugged Metal 2.5" PATA MLC SSD – HERCULES-Q Series provides high capacity flash memory Solid State Drive (SSD) that electrically complies with ATA/ATAPI 8 standard. APRO Rugged Metal 2.5" PATA MLC SSD – HERCULES-Q Series support UDMA-7 with high performance. The main used flash memories are MLC-NAND type flash memory chips. The available disk capacities are 16GB, 32GB, 64GB, 128GB and 256GB

The operating temperature grade is optional for Standard grade 0°C ~ 70°C and wide temp grade -40°C ~ +85°C. The data transfer performance by sequential read is up to 109.7 MB/sec, and sequential write is up to 106.1 MB/sec.

APRO Rugged Metal 2.5" PATA MLC SSD products provide a high level interface to the host computer. This interface allows a host computer to issue commands to the Rugged Metal 2.5" PATA MLC SSD to read or write blocks of memory. Each sector is protected by a powerful 72 bits per 1024 bytes error correction (ECC). APRO Rugged Metal 2.5" PATA MLC SSD HERCULES-Q Series intelligent controller manages interface protocols, data storage and retrieval as well as ECC, defect handling and diagnostics, power management and clock control.

Figure 1 shows a block diagram of the used high tech Rugged Metal 2.5" PATA MLC SSD controller.

## 1.1. Scope

This document describes features, specifications and installation guide of APRO's Rugged Metal 2.5" PATA MLC SSDs – HERCULES-Q Series. The appendix provides order information, warranty policy, RMA/DOA procedure for the most convenient reference.

## 1.2. System Features

- MLC-NAND type flash technology
- Standard 44-Pin PATA (IDE) male connector
- Extremely Rugged Metal casing to endure harsh environments
- PIO 0~6, MWDMA 0~4, UDMA 0~7 supported
- Non-volatile memory and no moving parts
- MLC Flash SSD standard grade capacity from 8GB up to 128GB
- Sequential read performance up to 109.7 MB/sec
- Sequential write performance up to 106.1 MB/sec
- Automatic 72 bits per 1024 bytes error correction (ECC) and retry capabilities
- +5V  $\pm$  10% operation
- Shock : 0.5ms, 1500 G, 3 axes
- Vibration : 7 Hz to 2K Hz, 20G, 3 axes
- Built-in Low Voltage Detector
- Very high performance, very low power consumption
- Low weight, Noiseless
- Standard grade supports operating temperature 0°C to +70°C, and Wide temp Grade supports -40°C to +85°C

## 1.3. Flash Management Technology - Global Wear Leveling

In order to gain the best management for flash memory, APRO 2.5" PATA MLC SSD HERCULES-Q Series applies Global Wear-leveling technology to manage the Flash system. The life of flash memory is limited; the management is to increase the life of the flash product. The objective of global wear leveling is to prevent any frequently updated data from staying at the static area so that wear leveling could be evenly applied to all blocks. Static areas contain any data that does not change, and are ignored by dynamic wear leveling. Such static data may include operating system files, table look-ups, executable files, and etc. Global wear leveling frequently replaces blocks in this area with block in the hot area, and thus each block in all areas has the same probability to be used.

Wear-leveling algorithm evenly distributes data over an entire Flash cell array and searches for the least used physical blocks. The identified low cycled sectors are used to write the data to those locations. If blocks are empty, the write occurs normally. If blocks contain data, it moves that data to a more heavily used location before it moves the newly written data. Wear leveling maximizes effective endurance Flash array compared to no wear leveling products.

### 1.4. Low Voltage Detector

APRO industrial 2.5" PATA SSD – HERCULES-Q Series has built-in Low Voltage Detector, it becomes active when detecting voltage threshold near 50% of the power it should receive from host. In this scenario, storage will take precedence for the data that host has already completed its command to write into flash at the same time whenever low voltage is detected.

### 1.5. Power-Loss Data Protection

APRO industrial 2.5" PATA SSD – HERCULES-Q Series utilizes host and device-initiated power fail protection mechanisms to guarantee data integrity. When encountering sudden power interruption, device will check the last programmed page for any uncorrectable error, if errors were found, all data written prior of the error will be moved to a new block while old block will be erased and corrected during the next power on.

## 2. Product Specifications

For all the following specifications, values are defined at ambient temperature and nominal supply voltage unless otherwise stated.

### 2.1. System Environmental Specifications

Table 1: Environmental Specification

APRO Rugged Metal 2.5" PATA MLC SSD HERCULES-Q Series		Standard Grade	Industrial Grade
		SR2IFxxxG-MQCTMA-U	WR2IFxxxG-MQCTMA-UC
Temperature	Operating:	0°C ~ +70°C	-40°C ~ +85°C
	Non-operating:	-20°C ~ +80°C	-50°C ~ +95°C
Humidity	Operating & Non-operating:	10% ~ 95% non-condensing	
Vibration	Operating & Non-operating:	7 Hz to 2K Hz, 20G, 3 axes	
Shock	Operating & Non-operating:	0.5ms, 1500 G, 3 axes	

### 2.2. System Power Requirements

Table 2: Power Requirement

APRO Rugged Metal 2.5" PATA MLC SSD HERCULES-Q Series		Standard Grade
		SR2IFxxxG-MQCTMA-U
DC Input Voltage (VCC) 100mV max. ripple(p-p)		+5V ± 10%
+5V Current (Maximum average value)	Reading Mode :	260 mA (max.)
	Writing Mode :	150 mA (max.)
	Idle Mode :	5.1 mA (max.)

## 2.3. System Performance

**Table 3: System Performances**

<b>Data Transfer Mode supporting</b>		PIO 0~6, MWDMA 0~4, UDMA 0~7 supported				
<b>Average Access Time</b>		0.5 ms (estimated)				
<b>Maximum Performance</b>	<b>Capacity</b>	<b>16GB</b>	<b>32GB</b>	<b>64GB</b>	<b>128GB</b>	<b>256GB</b>
	<b>Sequential Read (MB/s)</b>	109.1	102.0	109.7	109.1	108.9
	<b>Sequential Write(MB/s)</b>	45.1	49.5	74.0	106.1	103.0

Note:

- (1). All values quoted are typically at 25°C and nominal supply voltage.
- (2). Testing of the Rugged Metal 2.5" PATA MLC SSD maximum performance was performed under the following platform:
- Computer with AMD 3.0GHz processor
  - Windows XP Professional operating system

## 2.4. System Reliability

<b>Wear-leveling Algorithms</b>	Global Wear-leveling
<b>Bad Blocks Management</b>	Supported
<b>ECC Technology</b>	72 bits per 1024 bytes
<b>Endurance</b>	Un-limited Read Cycles
<b>Data Retention</b>	10 years

## 2.5. Physical Specifications

Refer to Table 5 and see Figure 3 for Rugged Metal 2.5" PATA MLC SSD HERCULES-Q Series physical specifications and dimensions.

### 2.5.1. Conformal coating

Conformal coating is a protective, dielectric coating designed to conform to the surface of an assembled printed circuit board. Commonly used conformal coatings include silicone, acrylic, urethane and epoxy. APRO applies only silicone on APRO storage products upon requested especially by customers. The type of silicone coating features good thermal shock resistance due to flexibility. It is also easy to apply and repair.

Conformal coating offers protection of circuitry from moisture, fungus, dust and corrosion caused by extreme environments. It also prevents damage from those Flash storages handling during construction, installation and use, and reduces mechanical stress on components and protects from thermal shock. The greatest advantage of conformal coating is to allow greater component density due to increased dielectric strength between conductors.

APRO uses MIL-I-46058C silicon conformal coating

## 3. Interface Description

### 3.1. APRO Rugged Metal 2.5" PATA MLC SSD interface

Pin 1 ~ pin 44 are for IDE interface. Pin A ~ pin D is for Master/Slave selection via physical jumpers.

### 3.2. Pin Assignments

Signals whose source is the host is designated as inputs while signals that APRO 2.5" PATA MLC Solid State Disk HERCULES-Q Series sources are outputs. The pin assignments are listed in below table 7.

**Table 7 - Pin Assignments**

**Appendix B: Limited Warranty**

APRO warrants your Rugged Metal 2.5" PATA MLC SSD against defects in material and workmanship for the life of the drive. The warranty is void in the case of misuse, accident, alteration, improper installation, misapplication or the result of unauthorized service or repair. The implied warranties of merchantability and fitness for a particular purpose, and all other warranties, expressed or implied, except as set forth in this warranty, shall not apply to the products delivered. In no event shall APRO be liable for any lost profits, lost savings or other incidental or consequential damages arising out of the use of, or inability to use, this product.

**BEFORE RETURNING PRODUCT, A RETURN MATERIAL AUTHORIZATION (RMA) MUST BE OBTAINED FROM APRO.**

Product shall be returned to APRO with shipping prepaid. If the product fails to conform based on customers' purchasing orders, APRO will reimburse customers for the transportation charges incurred.

**WARRANTY PERIOD:**

- xR2IFxxxG-MQCTMA-U/(C)

**2 years**

**The warranty period is able to extend. Please contact APRO and/or Your APRO distributors for more information.**
